

EC 48900(a)(1) — First Consideration Review

Source: Approved 30-Second Administrator Snapshot (anchor: #act-attempt-threat) — Locked Codex Content, Not Regenerated

LOCKED / APPROVED SOURCE TEXT — NO NEW LEGAL WORDING GENERATED

Consideration #1: What act, attempt, or threat occurred?

This is the first of the sequential considerations displayed on the EC 48900(a)(1) 30-Second Administrator Snapshot. It directs the administrator to determine, before any classification decision, whether the documented facts establish a caused physical injury, an attempted physical injury, or a threatened physical injury.

Three Statutory Paths (as approved in the locked snapshot)

1	Caused physical injury	The act resulted in actual bodily harm, pain, bruising, swelling, redness, a cut, or another physical injury.
2	Attempted physical injury	The student took a direct or substantial step toward causing injury — such as swinging, kicking, lunging, or throwing an object — even if no injury resulted.
3	Threatened physical injury	Words, gestures, or conduct communicated an intent to cause physical injury and reasonably created apprehension of harm.

Document the Facts (Path 4 of the locked snapshot)

- Exact act, attempted act, words, or gesture
- Sequence, location, witnesses, and available video
- Observed injury and nurse or medical information, when applicable
- Facts supporting school activity or attendance connection

When This Code Is Not Supported (Path 5 of the locked snapshot)

Do not use EC 48900(a)(1) when the investigation establishes no injury, no direct attempt to cause injury, and no communicated threat to cause injury.

Where This Consideration Routes On-Site

Per the locked site logic, Consideration #1 for record-008-48900-a links to the 30-Second Snapshot anchor **#act-attempt-threat** shown above. Consideration #3 in the same sequence links to the Investigation Roadmap / Interview Guide. This review covers Consideration #1 only, as requested.
